

Book vaccinations at home for your babies in {city}

Cloudnine is here to remind you about your children's vital vaccinations.

Don't let the present situation stop you from doing the right thing for your child.

Vaccinations are crucial during the first year for the child to stay healthy and infection-free.

Just consult your doctor on Cloudnine and book home vaccinations for your baby through Cloudnine's website. We'll then come to your doorstep to provide your babies with vaccinations/immunizations they're missing out on due to the current situation.

How to book 'vaccination at home' service?

- Use our online appointment booking widget on the website to book important vaccinations for newborn babies
- Select the option to book a video consultation with our pediatrician/child specialist and inform the doctor about the vaccination
- The doctor will write a prescription with the vaccines and it will be sent to the pharmacy
- You will get a call from the hospital for the home vaccination schedule
- A payment link will be shared with you and after your payment, 'home vaccination' will be scheduled based on your preferred date and time.

****T&C:- Home vaccination is available in selected cities and is subject to availability of the ambulance and staff at the scheduled date and time.***

Cloudnine is safe, and we'll make sure so are you!

We are religiously following these special safety measures:

1. Hand Sanitizers are placed in all the necessary locations including OP, IP, and general areas and our vehicles
2. Dedicated staff deployed at the entrance of the hospital with an infrared thermometer to screen people having a high body temperature
3. Cleaning and disinfection of all areas of the hospital and our vehicles is done at every two-hour interval
4. Scrubbing of the room and disinfection of the equipment and our ambulances is done post each patient's use.
5. All baby cradles and beds are sanitized properly after shifting from OT to the room and between the patient's use.
6. Our staff wears masks while on the floor, in the ambulance, washes and sanitizes hands every hour and when indicated between patient care
7. We follow government guidelines strictly
8. We follow national and international infection control practices at our hospitals.

In order to know more about your child's vaccination/s, please book a Virtual/Video consultation with Cloudnine's pediatrician through our website's online appointment widget. Our online video consultation with your pediatric specialist will make the process more comfortable for you.

On Cloudnine Vaccinations are provided until the child is four years of age. We recommend the following Cloudnine's baby vaccine schedule 2020, in India.
